

Data Analysis Presentation

How does the Research & Development expenditure of the Energy sub-sectors vary?

This histogram displays the total revenue for the energy sector within years 1 - 4.

The distribution is right-skewed which displays a positive value.

The Median of the Energy Sub-Sectors is \$1,070,707,477,000. These sub-sectors have a wide range from \$11,889,516,000, as the min, to \$4,822,225,252,000, as the max. The standard deviation is \$1,832,867,136,281 which means the variability for these sub-sectors is high and is spread out over a wider range.
